The background of the slide is a faded, light-colored photograph of a modern interior. It shows a wooden chair with a patterned cushion, a table with books, and a vase with dried plants. The overall aesthetic is clean and contemporary.

Welcome to the company ATI
It offers a new vision and a different perspective in
the world of interior and exterior designs

Who are we?

We are an elite group of engineers with a wide relationship and previous experience in the projects and designs implementation with a development artistic style, addition to a professional integrated team, it aims to satisfy and obtaining trust of the customers, that integrated by our partners from the international designs offices whose have the experience. The work of the team is based on interpreting the client's desire and providing distinguished proposals and actions with the most recent technologies with adhering to the completion and cost period of work

Our Message

- ✓ We work to save time and effort in designing and implementing palaces, residences and stores by taking latest and most recent requirements of interior, external and Landscape design. We design your own project according to the design style, which matches your taste and budget. We and our partner have an experience in the design by choosing the best forms and the most luxurious products which match the needs of our customers and exceed their expectations.

Our Vision

- ✓ Together to make a pioneering relationship that provides distinct and creative spatial designs in creating exceptional ideas for interior design and decoration resulting from a passion for caring for small details of art and harnessing Areas of spatial to meet human needs

Partners ATI

- ✓ in solidarity with global offices and local partners with long experience in completing interior and exterior design details and landscape works with the selection of elements and details of furniture and decorations from ancient and renovated international exhibitions and factories that would put the right element in the right place.

Mechanisms of work

- ✓ After visiting the site and seeing the client's desire to take into account all the particles and sites, the workshops begin with planning and drawing the final purpose for each site separately. By taking all the sizes, we start making designs and then presenting them in an integrated template.

Team Work

- ✓ An elite group of engineers with extensive relationships and previous experience in projects and implementation of designs in a sophisticated technical style, in addition to an integrated professional team that aims to satisfy customers and gain their confidence, and this is complemented by our partners from experienced international design offices. The team's work is based on translating the client's desire and presenting distinguished proposals and works with the latest technologies.

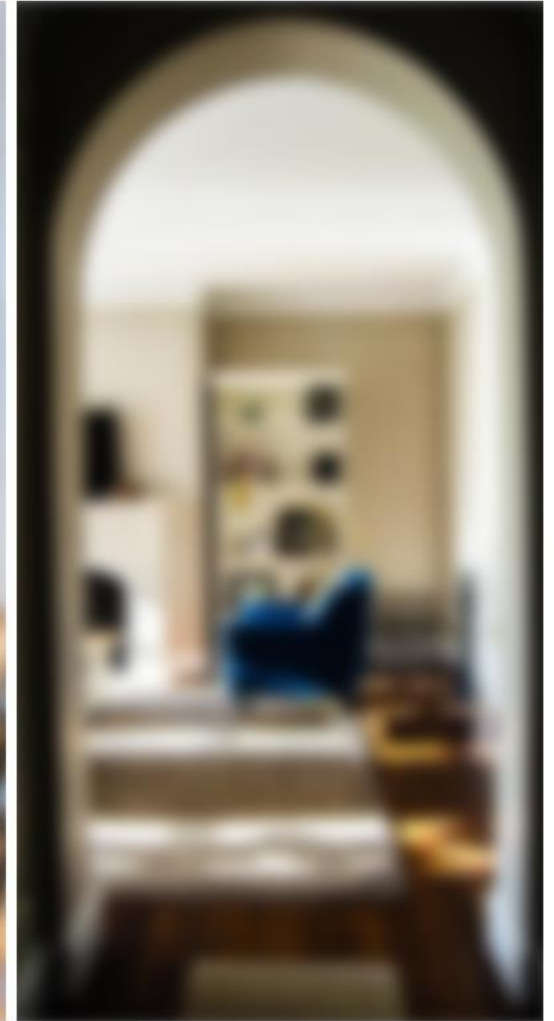

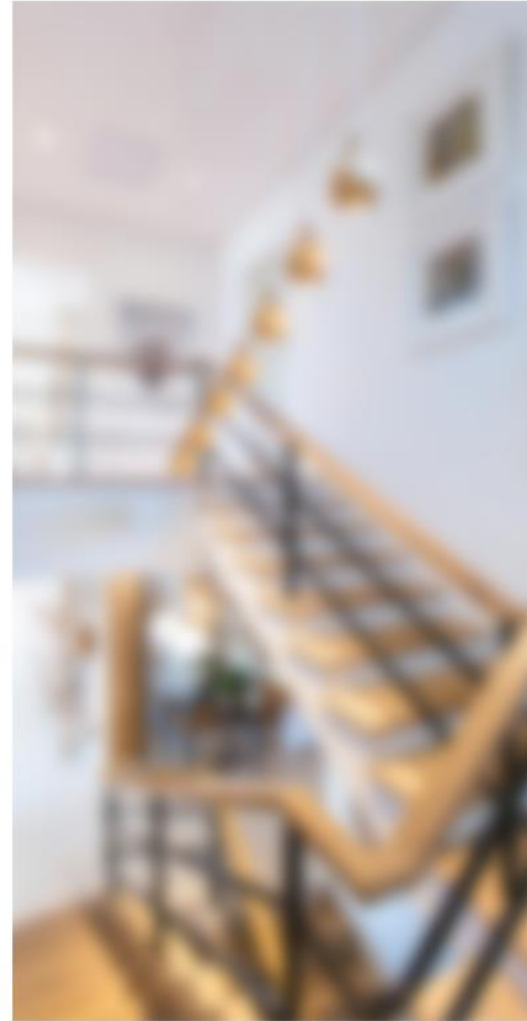

ATI Business

01

We design the interiors of palaces, homes and resorts with new methods and technologies and the highest style of consistency and creativity, where we start from where the others ended, taking into account the client's requirements in designing and choosing furniture using distinctive and modern decorations with the participation of a group of international companies with experience and that have Long-term experience in interior design work with the participation of designers with previous experience in interior designs of all kinds and shapes, and we are keen to have all our work in an integrated framework defined by the client's desire and the designer's view towards a distinctive and rich design

02

Because internal and external lighting is of utmost importance in completing the interior design, furniture and landscape works, palaces and resorts, it occupies a very important position for us in terms of choosing the appropriate lighting and distributing it in the appropriate form, colors and types.
