

The background of the slide is a collage of images related to onions and garlic. On the left, there are several whole onions, some yellow and some white, resting on a green and white checkered cloth. On the right, there are several heads of garlic, some whole and some partially peeled, on a light-colored surface. The overall theme is fresh produce.

Client Satisfaction

We understand the needs and demands of our clients and offer viable solution for the same.

ONION

Egyptian onion has its own niche in the international market for its aroma, taste, spice, color and size.

Egyptian onions are the most demanded onions over the globe with Egypt exporting it to most of the neighboring countries along with far off ones. Major varieties are RED ONION and Golden ONION of which Red onions are the most produced and exported variety worldwide.

The fertile soil and favourable climate in the Egypt are ideal for the cultivation of our onions. Did you know that onions are extremely healthy?

They are full of fibre, carbohydrates, vitamin C and antioxidants which help purify the blood, stimulate the heart and have a positive effect on the respiratory tract and digestive system

GARLIC

Garlic has been used in Egypt since ancient times and was highly revered for its life-giving properties and intense flavor. Egyptian garlic is an excellent source of vitamins C and B6, selenium, and manganese, and also contains some fiber, phosphorus, potassium, calcium, iron, and copper.

Egyptian garlic is smaller in size than common white garlic and has a globular, tear-drop bulb that connects into a stem, also known as a neck, that may appear green when fresh and brown when dried. Egyptian garlic is available year-round, with a peak season in the late spring through fall in Egypt.

Egyptian garlic can be consumed raw, thinly sliced and added to salads, or it can be chopped and mixed into sauces, dips, and spreads.

OUR VARIETIES

Brown or Yellow

The yellow onion is one of the onions most used in cooking due to its unmistakable but not strong flavor, which makes it very versatile for culinary use.

Red

Although red onions are ideal for including raw in many recipes due to their crunchy texture, as well as being very aesthetically pleasing.

Sweet

Very good for cooking or to eat raw in salad. The interior is white and fleshy, it has several overlapping layers and it is covered by an orangey-brown film.

Peeled

Our peeled onions is perfect for use in both professional and home cookery. Thanks to its processing and preparation, it is a product of the highest quality, which is not lacking the purest flavor.

Dehydrated

easier to handle, saves time, no fear of contamination, require no chopping or special treatment and easy to store for long time with long self life of dehydrated products. And more important that it can be enhanced without losing its natural values "

FRESH GARLIC BULBS

Fresh garlic is the garlic bulb collected from the field. Without any kind of transformation. When they arrive from the field they get sorted by different calibres and then a human team prepares them for presentation.

They are peeled and the root and stem are cut. Fresh garlic is commercialized in a wide range of formats, from two bulbs meshes to boxes of 10 kg or 15 lb.
